

## Exclusive Technology. Outstanding Results.

Recleim is the solution to your recycling and disposal challenges. We safely dispose of end-of-life vending machines and assume responsibility for meeting EPA requirements for the safe and legal de-manufacturing and disposal of that waste. Recleim employs advanced recycling and air purification technologies licensed from two European companies, Adelman and Lesni. These technologies have set a new standard for commodity recovery throughout Europe and in 60 plants worldwide.

We're innovative, efficient, environmentally responsible and cost-effective. Work with Recleim and reduce your operating costs by decreasing your waste disposal costs.

**Let's get started.**

Next-Generation Recycling

[www.Recleim.com](http://www.Recleim.com)

## Recleim is the next generation in vending machine recycling.

Recleim relieves you of the responsibility to safely and legally de-manufacture and dispose of materials according to EPA regulations. When you recycle with Recleim, we will remove your used vending machines at our expense. We'll even pay you when we take them away.

## We handle recycling challenges. You and our environment reap rewards.

Our proprietary recycling processes exceed all existing EPA standards. Our completely closed-loop resource-recovery technology cleanly and safely de-manufactures and recycles. We recover approximately 95% (by weight) of the commodity components in the machines recycled. We safely dispose of hazardous chemicals, minimizing waste and environmental impact.

## Studies show customers like doing business with companies that recycle.

-  **70 percent** of consumers want all or part of their products recycled
-  **82 percent** will go out of their way to purchase from a retailer that recycles
-  **67 percent** will pay more for a product when a retailer has recycling program

## Entrust your recycling to Recleim.

We'll work with you to identify the best solutions for your vending machine disposal needs and exceed all state, local, and EPA guidelines for the disposal of vending equipment. *Recleim will:*

-  **Purchase your vending machines** whole (as is, including refrigerant)
-  **Pick up equipment** from your location and transport it in enclosed trailers to our plant
-  **Provide end-of-life documentation** for EPA compliance

## Preserve the environment, Recleim the future for our next generation.

Working with Recleim gives you time to build your business. Recleim assumes the tedious tasks of equipment removal and filling out EPA paperwork, while you spend your valuable time on sales of new products and services.

There are tangible financial rewards *as you:*

-  **Lower your operating expenses** by eliminating labor costs for refrigerant recovery, compliance, disassembling and transporting units for sale to scrap yards
-  **Transfer EPA disposal requirements,** maintenance of destruction records and liability for disassembling and processing equipment to Recleim
-  **Receive payment** from Recleim when we remove your used equipment\*

## Become a Recleim Recycler.

To get started recycling your used vending machines with Recleim, contact Joe Laycock at **(803) 507-4534** or email [sales@reclim.com](mailto:sales@reclim.com).
